active material and an aqueous binder, the aqueous binder comprising a butadiene-based rubber and a cellulose-based compound.

11. (Cancel).

12. (New) A rechargeable lithium battery comprising:

a positive electrode;

a negative electrode comprising a negative active material and an aqueous binder, the aqueous binder comprising a butadiene-based rubber and a cellulose-based compound; and

a separator;

wherein a total amount of gas is generated during initial charging, wherein the gas generated has a CO content of 30 volume % or less, and further wherein the gas generated has a H₂ content of 0.2 volume % or less.
